Data Sheet: Data sheets are used to help you pull out information from your sources.

CITATION:
Look up how to cite your particular piece of research and fill it in here. Please consult this website: http://owl.english.purdue.edu/owl/ & click on 2009 MLA Guide on the left hand side. Once that pops up – click on your source on the left-hand side or use the handout given to you in class! (REMEMBER TO FOLLOW THE INDENTATION RULES!) You may also use www.easybib.com.

List 5-10 interesting and/or important facts about your topic that is found in this source and not in any other. Include a page citation for information that is directly quoted or paraphrased (statistics, expert opinion, summaries, etc.). Please indicate the type of quote in front of the number! P, Q, S
